Tajuk/ Nama Kursus/ Nama Program	Nonlinguistic Communication & Deception Detection Skills.
Sinopsis	The science of this course is in its systematic approach to Deception Detection in an investigation, interview, or interrogation. Through an effective understanding of Nonlinguistic communication and the verbal language of deception. Proven in countless situations through, Observation While Listening, (The OWL mode to detecting deception) together with investigative techniques, questioning skills & strategies, effective perceptive tools, and understanding of Nonlinguistic communication and the verbal language of deception one can get to the truth successfully. To get to the truth, the course teaches participants to overcome beliefs that people will not lie, teaches them how to overcome their involuntary reliance on behavioral myths, how to overcome their communication difficulties, and gives them the knowledge to overcome their inescapable biases that can prejudice their chance to a correct judgment of truth during an interview, investigation or interrogation. It's a truth that behavioral clues to lies do continually provide absolute evidence of crimes but it does alert us to further investigation and scientific analysis, where we can then uncover lies and reveal evidence of the truth, systematically rather than what most people have been doing speculatively. Participants attending this course would then learn two other risks in detecting deceit, disbelieving (judging a truthful person to be lying) and believing-a-lie (judging a liar to be truthful). They would further learn that the absence of signs of deceit is also not the truth, because some people don't leak. The same is true that a sign of deceit is not always evidence of lying, as some people appear guilty even when they are truthful. Yet, participants would learn that more than one indicator, that is, a cluster, within five seconds after a strategic and effective question is asked or a stimulus is given, the result is often the truth that the suspect is lying. These 5 days advanced course on Nonlinguistic Communication & Deception Detection Skills teaches participants to interpret Nonlinguistic communication correctly and methodically and to learn the verbal language of deception effectively. They would also learn skills to questioning strategies and the know-how of investigative interviewing skills that when practiced and applied would certainly succeed in detecting deception as good investigators, interviewers, and interrogators.
Hasil Pembelajaran (Learning Outcomes)	1. Learning skills to become a good investigator or interviewer. 2. Learning the latest deception detection methodology. 3. Learning to detect the truth in lies when investigating or interviewing. 4. Learning to help subjects & suspects avoid anxiety when interviewing. 5. Understand how deceptive people hide their emotions and how trained investigators can learn to identify these signals in an interview. 6. Become skilled at identifying verbal leakages & non-verbal leakages. 7. Learn how people unconsciously, signal their manner, needs & deepest belief with their bodies & behavior, often more powerfully than with their words in an interview or interrogation.
Mod Pengajian (Delivery Mode) / Kaedah Pelaksanaan	• Presentations and discussions with easy-to-understand illustrations using PowerPoint slides

	• Real-life videos and case stories to reinforce the understanding of the guiding principles behind effective Nonlinguistic communication and the Deception Detection Model's Psychology. • The trainer will also demonstrate the effectiveness of the Deception Detection Model's application in determining truth and lies through the application of the psychology learned.
Tempoh (Duration)	5 working days
Kumpulan Sasaran (Target Participant)	Interviewers, Investigators, Interrogators, Detecting fraudsters/ con-men / liars
Syarat Permohonan/ Syarat Kemasukan (Admission Requirement)	Nil
Struktur Kursus (Course Outline) / Struktur Kurikulum (Topics Covered)	Module 1: Understanding the complexities of communication Module 2: Understanding & Interpreting Nonlinguistic communication Module 3: The Deception Detection Model. Module 4: Detecting Bodily Cues of Deception. (Non-Verbal Indicators) Module 5: Identifying Verbal Cues of Deception. (Verbal Indicators) Module 6: Overcoming Powerful Lies / Convincing Statements Module 7: Other Non-Verbal Indicators, Facial & Micro Expressions. Module 8: Questioning Strategies to Stimulate Truth. Module 9: Eye Accessing Cues Module 10: Creating A Conducive Environment. Module 11: Preventing Psychological Entrenchments.
Yuran Pengajian / Yuran Kursus (Fees)	
Jadual Kursus/ Course Schedule	As attached (Kembaran A)
Biodata Ringkas Tenaga Pengajar / Brief CV of Tutors	As attached (Kembaran B)

NONLINGUISTIC COMMUNICATION & DECEPTION DETECTION SKILLS COURSE

TIME	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
0800 0900	Introduction / Breaking The Ice	Group Revision of Module 1-3	Group Revision of Module 4-5	Group Revision of Module 6-7	Group Revision of Module 8-9

	Case Study 2	Workbook Discussion			Certificate Presentation

Jackson Yogarajah a former trainer on deception detection with the Special Branch of the Royal Malaysia Police Force is also the author of the influential book, "55 Reasons Why Sharifah Aini Was Not Lying," (2004) which adeptly employed Deception Detection skills and techniques to vindicate Datuk Sharifah Aini from being charged in Malaysia's courts.

His insights on Deception Detection are in almost all renowned publications such as the New Straits Times, The Star, The Sun, Malay Mail, China Press, Metro, Perdana, The Indonesian Customs Journal, The Borneo Bulletin, and the Brunei Darussalam Daily Newspapers. Widely regarded as the "Human Lie Detector," Jackson continues to captivate audiences through his stage presentations, regular newspaper articles, compelling narratives, and illuminating books centered around the intricate dynamics of deception.

At the PASIA World Annual Conference held at the prestigious Marriot Hotel in Manila, Philippines, Mr. Jackson captivated the audience as a distinguished speaker on Deception Detection. Renowned for his remarkable skills in discerning truth from falsehood, Mr. Jackson left an indelible mark on the event. His exceptional ability to identify deception on stage among two unknown participants amidst a crowd of nearly 500 attendees was vividly captured on video, showcasing his unparalleled expertise in action.

Known both locally and internationally, Jackson's methodology is meticulously crafted over years of practice, his expertise transcends borders, as evidenced by his exclusive invitation to speak on Deception Detection at the United Kingdom Center for Forensic Neuroscience in 2013, an honor extended to only him from Malaysia. His influence has also been felt across international waters, with training engagements in the Netherlands, Indonesia, Brunei, Singapore, and the Philippines, underscoring his global impact in the field.

An author with five valued publications to his name, his fourth book on Nonlinguistic Communication and Deception serves as a textbook at the National University of Defense Malaysia. His latest book, "A TO Z About Body Language," has earned a prestigious 5-star rating online, further solidifying his reputation as a foremost authority in the realm of nonlinguistic communication and deception detection in Malaysia.
